

Privacy Policy

Effective from 4 October 2026 · soslive.endorbit.hu · Magyar változat:
soslive.endorbit.hu/legal/adatvedelem.pdf

1. Data controller

Name	Magyar Bertalan Márton, sole proprietor (egyéni vállalkozó), Hungary
Tax number	55238205-1-33
Registered address	Compó utca 99., 2117 Isaszeg, Hungary
Contact	info@endorbit.hu
Website	https://soslive.endorbit.hu

This policy applies to the SOSlive service: the SOSlive website (soslive.endorbit.hu) and the SOSlive Android and iOS mobile apps (together: **SOSlive**). We process personal data in accordance with the EU General Data Protection Regulation (GDPR, Regulation (EU) 2016/679) and Hungarian Act CXII of 2011 on informational self-determination.

2. Summary

- Your events (live stream link, location, messages, images) and your settings (e-mail addresses and phone numbers to notify) are stored in **your own Google Drive**, in a folder named *SOSlive*. The SOSlive server **does not see or store them**: the mobile app and your browser communicate with Google directly.
- The SOSlive server stores only the minimum needed for sign-in: your name, e-mail address, Google account ID and the time of your last sign-in.
- We do not use advertising, analytics or tracking cookies, and we do not sell your data.

3. What data we process, why and for how long

3.1. Data stored on the SOSlive server

Data	Purpose	Legal basis	Retention
Name, e-mail address, Google account ID, time of registration and last sign-in	User account, sign-in with Google	Performance of contract (GDPR Art. 6(1)(b))	Until the account is deleted
Session data: IP address, browser identifier (user agent), last activity; “remember me” identifier	Keeping you signed in, preventing abuse	Legitimate interest (GDPR Art. 6(1)(f))	Until the session ends (120 minutes of inactivity) or you sign out
Server logs (IP address, time, requested URL, browser)	Operation, troubleshooting, security	Legitimate interest (GDPR Art. 6(1)(f))	Up to 30 days

Data you provide when contacting us (e.g. e-mail)	Answering your request, handling your rights	Legitimate interest, legal obligation	1 year after the request is closed
---	--	---------------------------------------	------------------------------------

The SOSlive server **does not store Google access tokens** and has no access to your Google Drive.

3.2. Data stored in your own Google Drive

The following data is stored in your Google Drive, in the *SOSlive* folder. You control it: the SOSlive apps (mobile app, browser) read or write it only at your request and with your Google account's permission; it is never sent to the SOSlive server. You can delete it from your Drive at any time.

- **Events:** start time, stream link (and, if you provide them, the link of your stream provider's page and of the recording), your location (every 30 seconds), messages, images.
- **Settings** (`config.json`): e-mail addresses and phone numbers to notify, number of events to keep.
- **Sharing:** the Google accounts you share your events with in the mobile app (kept by Google Drive).

3.3. Mobile app

When you start an event – only at your initiative and with your permission – the mobile app uses your device's location, camera and microphone. It sends the video to the stream provider you configured. It sends notifications (SMS, e-mail) from your device, on your behalf, to the recipients you specified. The mobile app does not communicate with the SOSlive server.

3.4. Other people's data

If you add people to notify, share your events with someone, or other people appear in your recording, you provide and control their data. Please do so only with their knowledge and consent. The SOSlive server never receives this data.

4. Google user data

SOSlive requests the following access to sign you in with your Google account and to use Google Drive:

Scope	How we use it
openid, email, profile	Sign-in: your name, e-mail address and Google account ID for your user account (section 3.1).
drive.file	Access only to the Drive files and folders created by SOSlive, or explicitly selected by you (e.g. a folder of events shared with you). SOSlive cannot see your other Drive files. It is used to read and write your events and settings (section 3.2).

- We use data received from Google only to provide the features above. We do not sell it, do not transfer it to third parties (except the processors in section 6, to provide the service), do not use it for advertising or for determining creditworthiness, and do not use it to train artificial intelligence or machine learning models.
- No human reads this data unless you explicitly consent (e.g. when reporting a problem), it is necessary for security purposes (investigating abuse), or it is required by law.

- **SOSlive's use and transfer of information received from Google APIs to any other app will adhere to the [Google API Services User Data Policy](#), including the Limited Use requirements.**
- You can revoke access at any time: myaccount.google.com/permissions.

5. Public event links and sharing

- Your event files are created with “anyone with the link can view” permission, so the people you notify can open the event page without signing in (soslive.endorbit.hu/e/...). **Anyone who has the link can see the event** (location, messages, images, stream link). Event pages are not indexed by search engines.
- If you share your events with someone in the mobile app, they can see all your events (including future ones) with their Google account, but not your settings. You can revoke sharing in the mobile app.
- Viewers' browsers download the event directly from Google; the SOSlive server stores no data about viewers (other than the server logs in section 3.1).

6. Processors and recipients

Provider	Role
Google LLC / Google Ireland Ltd.	Sign in with Google, Google Drive (storing your data in your own Google account), Google Picker. Google's own privacy policy applies: policies.google.com/privacy .
Cweb.hu Informatikai Kft. (Borsó utca 12-32., 1173 Budapest, Hungary; company reg. no.: 01-09-436264; tax no.: 32666032-1-42)	Hosting of the SOSlive website and server
OpenStreetMap Foundation	Map tiles on the event page; when the map loads, the viewer's IP address is sent to the tile server.
jsDelivr (CDN)	Delivery of the video player (hls.js) on the event page; the viewer's IP address is sent to the CDN.
The stream provider you choose (e.g. YouTube, Twitch or another RTMP / HLS provider)	Transmitting and playing the live video, under its own terms.

Google may process data outside the European Union (e.g. in the United States) on the basis of the European Commission's adequacy decision (EU-US Data Privacy Framework) or standard contractual clauses.

7. Cookies and local storage

Name	Type	Purpose	Lifetime
Session cookie (..._session)	Cookie, /app path only	Keeping you signed in	120 minutes of inactivity

XSRF - TOKEN	Cookie, /app path only	Form protection (CSRF)	Same as the session
remember_web_...	Cookie	"Remember me"	Until sign-out, at most 400 days
soslive.loggedIn	localStorage	Tells the browser whether you are signed in	Until sign-out
soslive.driveToken	sessionStorage	Google Drive access until the browser tab is closed	At most 1 hour / until sign-out

These are strictly necessary for the service, so no consent is requested. We do not use analytics, advertising or tracking cookies.

8. Security

All connections are encrypted (HTTPS). The server stores only the minimum necessary data and no Google tokens or event data. The administration interface is password protected and accessible only to the controller.

9. Children

SOSlive is not intended for children under 16.

10. Your rights

- **Access, rectification, erasure:** you can ask what data we hold about you, and ask us to correct or delete it. To delete your account, write to info@endorbit.hu; you can delete the data in your Drive yourself.
- **Restriction, objection, data portability:** under GDPR Articles 18, 20 and 21.
- We respond to your request within one month.
- **Complaints:** Hungarian National Authority for Data Protection and Freedom of Information (NAIH), Falk Miksa utca 9-11, 1055 Budapest, Hungary, naih.hu, ugyfelszolgalat@naih.hu, or the data protection authority of your EU country of residence. You may also go to court.

11. Changes

We may update this policy; we will announce material changes on the website. The current version is always available at soslive.endorbit.hu/legal/privacy-policy.pdf.
